SUMMARY

Fresh graduate in Informatics Engineering with hands-on experience building secure, maintainable web applications using Laravel and PostgreSQL. Contributed to cybersecurity incident management and penetration testing tracking platforms during an internship at Indonesia's Constitutional Court (Mahkamah Konstitusi). Experienced with structured backend architecture (Controller-Service-Request pattern), role-based access control, and server-side data processing. Comfortable working in Git-based team environments.

TECHNICAL SKILLS

- **Languages:** PHP, Go (Learning), Python (Learning)
- **Frontend:** HTML5, CSS3, Bootstrap
- **Backend:** Laravel, NestJS
- **Databases:** PostgreSQL, MySQL
- **Tools & Version Control:** Git, GitLab

PROFESSIONAL EXPERIENCE

Programmer Intern

Nov 2025 – May 2026

Pusat Teknologi Informasi dan Komunikasi, Mahkamah Konstitusi RI - Jakarta, Indonesia - On-site - MagangHub Kemnaker

- Developed and maintained multiple web-based applications using Laravel, PostgreSQL, and NestJS — including a CSIRT Ticketing Platform, SecureTrack (pentest tracker), an asset management system, and an internal administration portal.
- Implemented structured backend architecture based on the Controller-Service-Request (CSR) pattern, enforcing clear separation of business logic across all feature modules.
- Built and managed role-based access control (RBAC), input validation, and server-side DataTables integration to support multi-role workflows in security-critical environments.
- Contributed to a data scraping pipeline to automate information gathering and integration across internal systems.
- Collaborated in a small development team using Git/GitLab for source code versioning and synchronization.

PROJECT

Medicine Inventory Management System

Apr – Jun 2025

Final Year Project – Universitas Putra Indonesia YPTK Padang

- Developed a web-based inventory system for a hospital pharmacy using Laravel and MySQL, supporting daily tracking of medicine consumption and stock levels.
- Implemented Safety Stock and Reorder Point (RoP) algorithms to generate automated procurement recommendations, reducing manual forecasting effort.
- Optimized server-side data processing and database relationships for reliable performance across large stock datasets.

OTHER EXPERIENCE

Web Development Training – PHP Laravel

Aug – Dec 2024

Someah Indonesia - Remote

- Completed an intensive, project-based web development program focused on Laravel.
- Collaborated in a team to build an online learning platform, contributing to backend features including user authentication, course management, content delivery, and transaction handling.
- Practiced Git/GitLab workflow for collaborative source code management throughout the program.

EDUCATION

Bachelor of Informatics Engineering

Aug 2021 – Oct 2025

Universitas Putra Indonesia YPTK Padang – CGPA: 3.34/4.00

Thesis : “IT Management for Medicine Inventory at West Sumatera Lung Hospital
Using the Reorder Point Method”

CERTIFICATIONS

Web Development With PHP Laravel – Someah Indonesia

Dec 2024
